Ravi Kiran Selvam

Apt #5, The Spot, 721 W 30th Street, Los Angeles, CA 90007|rselvam@usc.edu|www.sravikiran.com |+1 213-800-6664

EDUCATION

M.S in Applied Data Science
University of Southern California - Viterbi School of Engineering **May 2021***
B.E. in Computer Science *(Among top 5% out of 180 students)*
Anna University - CEG Campus CGPA- 9.47/10 **April 2019**

SKILLS

Operating Systems: Linux, macOS, Windows
Languages: C, C++, Python (Proficient); Java (Intermediate);
Database and Client/Server Technologies: MySQL, MongoDB, Snowflake, Azure Data lake, Flask, Bootstrap, JavaScript, Firebase
Software Tools: Git, Android Studio, Anaconda
ML Frameworks: Tensorflow, Keras, scikit-learn

OPEN SOURCE CONTRIBUTIONS

***Google Summer of Code 2018 Student Developer*, CERN** **April 2018 - August 2018**

- Provided support for advanced deep learning optimizers in the open-sourced **ROOT-TMVA, a data analysis software framework** by CERN
- Implemented deep learning optimization algorithms (SGD, RMSProp, Adam, Adagrad, etc.) by exploiting the parallel programming capabilities using C++ and low-level libraries (Blas, CUDA and CuBlas in CPU & GPU architecture); my code has been successfully integrated into the new production release of ROOT version 6.16
- Tech stack: **C++, Blas, CUDA, CuBlas**

EXPERIENCE

***Software Development Engineer Intern*, Amazon** **May 2017- July 2017**

- Developed prototype features for **Amazon-Fire TV Stick** to integrate marketing notifications using Amazon's internal library
- Created a prototype to integrate IMDB ratings with Amazon Prime videos, where the user's rating for a particular video will get accumulated to the IMDB rating
- Tech: **Java, XML, Software testing, Software design principles**

***Data Science Intern,* Motorq** **December 2018 - June 2019**

- Set up the **initial Data Science workflow** and infrastructure for building ML models
- Analyzed **large-scale connected car data** from IoT devices and solved problems such as refueling event detection, idling time detecting, trip completion event detection
- Designed and Implemented **various engine hour metrics, meta-metrics** for different parameters of car data and analyzed the trends across time and build the **battery voltage failure prediction model**
- Tech stack: **Python, numpy, pandas, matplotlib, plotly, scikit-learn, TensorFlow, snowflake, Azure Data lake, Azure VM**

***Machine Learning Intern,* Kenome Technologies** **May 2018 - June 2018**

- Built a deep learning model to perform **sequence tagging** for colors, materials, and patterns in text documents
- Built a method for data-annotation by reducing the time complexity of string matching from naive algorithm using a modified version of Trie data structure. Observed a maximum F1 score of 0.94 for tagging colors and materials in the testing data set
- Built a dashboard to **visualize the crypto-currency prediction model** using Plotly and d3 libraries
- Tech stack: **Python, TensorFlow, Keras, AWS EC2, plotly, d3**

PROJECTS

DocDroid Application for Medical Emergency **Dec 2017 - Jan 2018**

- Developed an android application to facilitate people during medical emergencies
- Built server-side using Flask framework; enabled automatic booking of ambulance & allocation of nearest hospital with an adequate facility to patients with a single tap
- Sent notification to patient's emergency contacts to live track the ambulance

- Technologies: **Python, Flask, Java, XML, Firebase, scikit-learn**

Online Assessment System **Aug 2017 - Oct 2017**

- Created a web application for college students to attend online assessments
- Developed a user-friendly UI to enable faculty to create online tests for students; Automatically scored objectives and descriptive answers by matching key answers given by faculty
- Technologies: **Python, Flask, Bootstrap, Javascript, HTML, Jquery**

Alpha Math Tools **Sep 2015 - Nov 2015**

- Developed an android application to solve basic mathematical problems
- Incorporated options to calculate interest for automobile/home loans and solve linear/quadratic equations for students; Available on Play Store with 4.9 rating and 100+ downloads
- Technologies: **Java, XML**

AWARDS

- Ranked 35th among 250 teams (Amritapuri Regionals) and 30th among 120 teams (Chennai Regionals) **across India** in ACM International Collegiate Programming Contest, **December 2017**
- Won 25 coding (algorithmic) competitions in 12 inter-college tech fests (by securing 1st among ~400 participants), **October 2016 - March 2019**

RESEARCH EXPERIENCE

Power Graph for Citation Network **August 2017 - November 2017**

- Developed a new data structure (**in C++**) by modifying power graph to represent relationships between author and co-author in a citation network dataset.
- Deduced algorithms to perform queries like finding the bonding value between authors (to find the type of citation between papers) and a similarity index between research papers.

RESEARCH PAPERS PENDING PUBLICATION

- Mahalakshmi G.S*, Makesh Narsimhan Sreedhar*, **Ravi Kiran Selvam***, Sendhilkumar S: ***Exploiting Bi-LSTMs for Named Entity Recognition in Indian Culinary Science***; In proceedings of the 4th international conference on Next Generation Computing Technologies, NGCT 2018; In Communications in Computer and Information Science Series of Springer Journal. (accepted and presented on November 2018)

CERTIFICATIONS

- Big Data Specialization (series of 6 courses) by UofCalifornia San Diego, Coursera, **(ongoing)**
- Deep Learning Specialization (series of 5 courses) by Deeplearning.ai, Coursera, **March 2018**
- Machine Learning by Stanford University, Coursera, **December 2017**
- Codechef Certified Data Structures and Algorithms Program (CCDSAP) - Advanced Level, CodeChef, **November 2017**

EXTRA-CURRICULAR ACTIVITIES

- **Founder, CEG Codechef Campus Chapter** - Delivered lectures on competitive programming to many college students and trained them to participate in the ACM-ICPC, **September 2018 - March 2019**
- **Problem Setter, Abacus'17 & Abacus'18**, departmental inter-collegiate national-level technical symposium- Organized 5 intercollegiate onsite & online programming contests (HackerRank, CodeChef), Anna University, **March 2017 & March 2018**
- **Volunteer, CEG Linux Users group (CEGLUG)** - Delivered lectures on open source tools to many college students to create awareness about the same, **September 2017 - March 2019**
- **Authored 2 blogs** for beginners on Algorithms and Data Structures with ~10,000 page views, (Link1, Link 2), **March 2016 - May 2017**

LANGUAGES: English, Tamil (Read/Write/Speak)
